NATIONS UNIES

OFFICE OF THE UNITED NATIONS SPECIAL CO-ORDINATOR

SOCIO-ECONOMIC REPORT – NOVEMBER 2010

Since 1996 UNSCO has continually monitored and reported on socio-economic conditions in the occupied Palestinian territory and in the process established an extensive socio-economic database. UNSCO does not create raw data but rather uses available data which, in the occupied Palestinian territory (oPt), are relatively abundant. However, the data that are available tend to remain dispersed and are not always automatically shared between institutions. The objective of the database is to bring together in one place a wide variety of data on socio-economic conditions and by doing so present a broader, more detailed perspective on socio-economic conditions. The purpose of this report is to: 1) broaden the access to this database through publication of the most recent data gathered; and 2) provide readers with up-to-date information on socio-economic conditions in the occupied Palestinian territory.

The report is divided into four sections:

Section 1 consists of a one-page fact sheet which provides a snapshot view of the socio-economic situation for the current and previous reporting periods and it provides, for reference purposes, baseline figures for the period just prior to the outbreak of the second *Intifada*.

Sections 2 and 3 report on the macro-economic situation and economic activity throughout the oPt, including private sector and banking activity. Section 4 focuses on access of goods in and out of the Gaza strip. All sections provide data on the last six reporting periods for each indicator as well as baseline data, which are pre *Al-Aqsa intifada*. In addition, a summary analysis on observed trends is presented below each table.

For further information please contact:

Gaza Strip: *Raed Raqeb* raqeb@un.org

1 The base year for GDP is 2004.

2 These numbers may be adjusted.

3 No available baseline data on the year 2000.

4 These numbers may be adjusted.

5 For a more detailed report on sections C (Macro-economy) and D (Private sector), see data below.

6 CPI base year for 2004 = 100.

7 MoNE data do not include aggregates or aid flows in Aug 2000.

8 For indicators measured on a monthly basis, August 2000 is used as a baseline since Intifada broke out.

9 Adjusted unemployment is calculated by adding discouraged workers (i.e. unemployed but no longer seeking work) to the ILO standard.

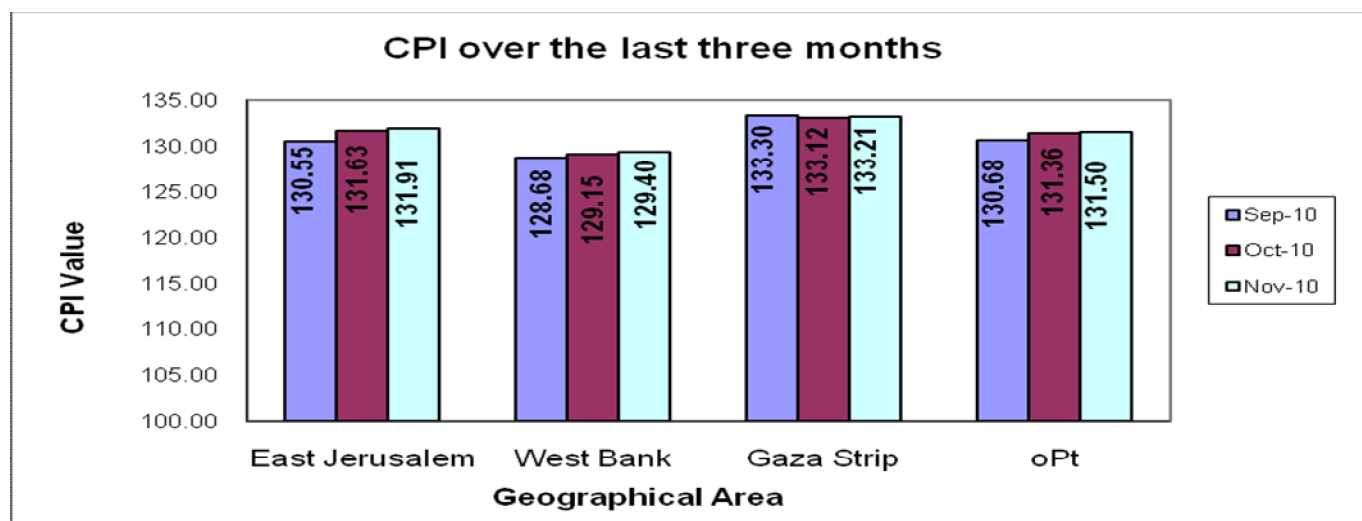

10 Effective closure days are calculated by adding all days when a crossing was fully or partially closed, excluding weekends and holidays. Partial closure means that the crossing was partially closed for more than one hour but not for a full day, where it would be considered full closure. Karni - conveyor belt/chute -The conveyor belt/chute for cereals and animal feed at Karni is the only operational one. Rafah Crossing for passengers is partially opened for humanitarian purposes.

The Palestine Monetary Authority provides adjusted data once every three months. In relative terms, Local and foreign Trade Finance and Other Public Services show an increase in the use of credit. Bank credit to the Total Public Sector an increase of approximately 7.34% in Q3-2010 when compared with Q2-2010. (Please note the PMA has adjusted the indicators for bank credit by economic activities starting Q3-2008. Due to such significant changes in the methodology, current trends cannot be compared to those prior to 2008.)

Source: PMA

In a functioning economy, an increase in the loans versus deposits ratio is perceived as a positive sign, as monies are not saved but invested or consumed, each of which acts as a stimulant for the economy. Since September 2006, this ratio had steadily declined in the oPt signaling little optimism in the prospects for the Palestinian economy. However, Q3-2010 indicates an increase in total loans of approximately 7.28%, and an increase in total deposits of 5.46% compared with Q2- 2010.

Exports have stopped altogether except for limited agricultural exports in November 2010. Israel allowed Gaza to export strawberries and flowers to Europe. In November 2010, 4 trucks of strawberries (5.7 tonnes) and carnations (43,000 stems) have been allowed out via Kerem Shalom Crossing were exported. November 2010 data indicate a decline in the total number of imported truckloads to the Gaza Strip by approximately 11%, compared to October 2010 (4,091 vs. 4,576). Karni crossing has remained closed since 12 June 2007 for the movement of goods in and out of Gaza. The single conveyor belt/chute for cereals and animal feed at Karni was open for a total of 9 days. Eight hundred and fifty truckloads of animal feed (37.4%), and wheat (31.4%) and gravel (31.2%) for UNRWA, and Coastal Municipalities Water Utility entered Gaza via the conveyor belt. Of the 3,136 truckloads entering Gaza during the month through Karem Shalom (Karm Abu Salem), 270 (or 8.61%) were designated for humanitarian aid agencies and the remaining 2,866 (or 91.39%) were for the private sector. Food items made up the majority of imported goods (1,414 truckloads, or 40%) while 1,722 truckloads, or 60%, were for non-food items.
